MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. VIII

OTTAWA, SEPTEMBER, 1933

No. 9

DOMINION STATISTICIAN: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.
CHIEF, BRANCH OF GENERAL STATISTICS: S. A. CUDMORE, M.A., F.S.S.
ASSISTANT ON BUSINESS STATISTICS: SYDNEY B. SMITH, M.A.

THE BUSINESS SITUATION IN CANADA

Economic conditions were well maintained in August despite the speculative reaction in the latter part of the preceding month. The favourable factors tending to inspire confidence were the substantial gain in business operations continuing the marked advance of the second quarter and the significant strength in high-grade bonds indicating the further betterment in credit conditions. The yield on representative Ontario government bonds was 4.55 p.c. in August compared with 4.63, reflecting a relatively substantial gain in prices. The bid prices of four Dominion Government refunding bonds showed gradual appreciation during the month, when a high point was reached for the period since Great Britain was forced off gold in September 1931. The yield on the four bonds was computed as 4.43 p.c. compared with 4.50 in July.

The decline in demand deposits at the end of July was mainly seasonal, and a fall was shown in notice deposits and current loans. Investment holdings at \$865,900,000 show a gain to a new high point, contributing to the improved liquid position of the banks.

The index of common stock prices receded to 78.7 compared with 83.3 in the preceding month. While the average prices were lower, weekly analysis shows that subsequent to the reaction in the latter part of July, the trend was upward during the month under review.

It was gratifying to find that the reaction in speculative prices did not interfere with industrial expansion, business operations in August showing a considerable advance over the preceding month. The index of the physical volume of business was 89.8 compared with 84.1 in July, a gain of 6.8 p.c.

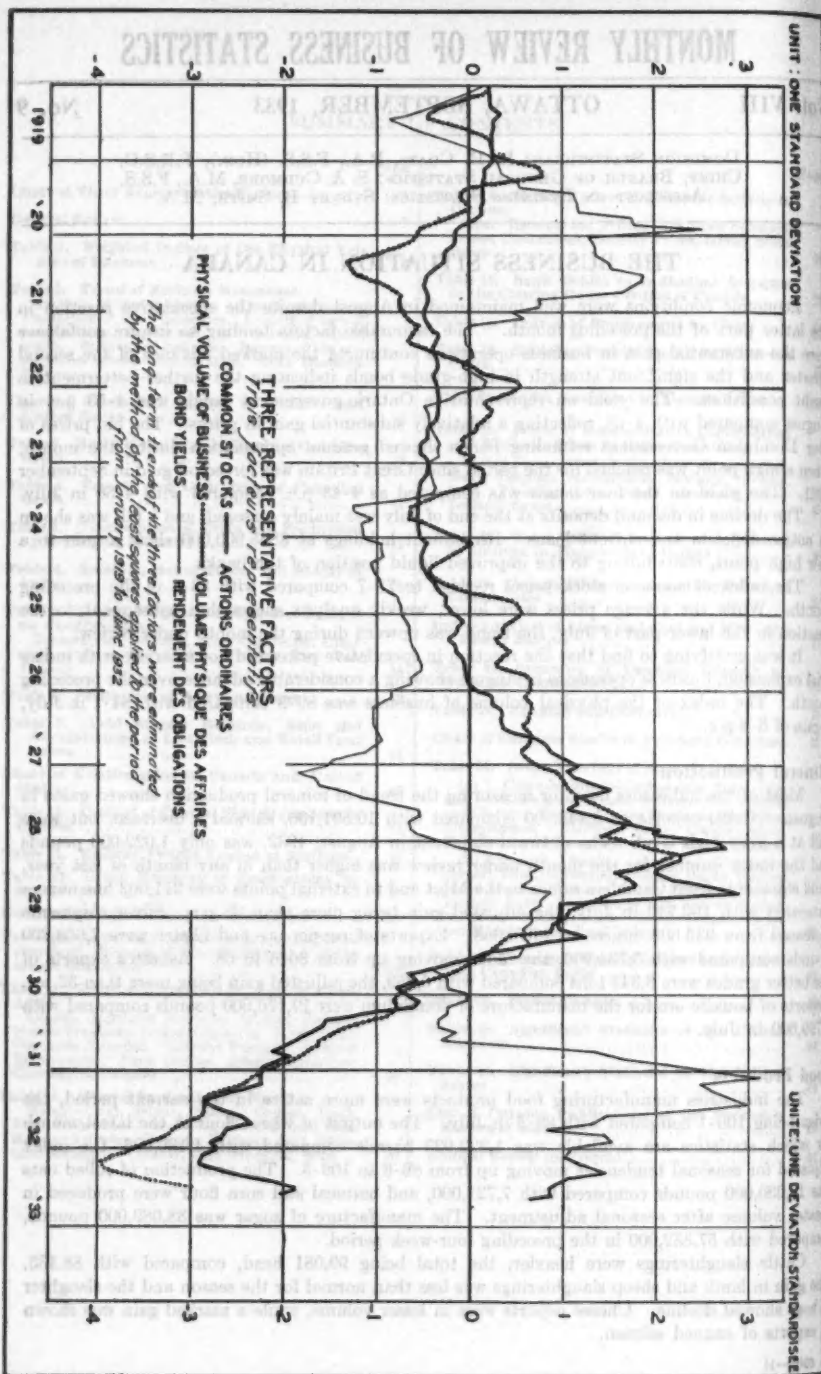

Mineral Production

Most of the indicators used for measuring the trend of mineral production showed gains in August. Nickel exports at 8,443,800 compared with 10,501,100, showed a decrease, but were still at a very high level. The outward shipment in August, 1932, was only 1,022,000 pounds and the index number for the month under review was higher than in any month of last year. Gold shipments from Canadian mines to the Mint and to external points were 211,062 fine ounces compared with 192,740 in July, the adjusted gain being more than 23 p.c. Silver shipments increased from 936,609 ounces to 1,374,068. Exports of copper ore and blister were 7,660,200 pounds compared with 3,734,900, the index moving up from 36.6 to 68. Asbestos exports of the better grades were 8,342 tons compared with 6,259, the adjusted gain being more than 32 p.c. Imports of bauxite ore for the manufacture of aluminium were 12,176,600 pounds compared with 4,799,600 in July.

Food Products

The industries manufacturing food products were more active in the current period, the index being 100.1 compared with 88.5 in July. The output of wheat flour in the latest month for which statistics are available was 1,322,923 barrels compared with 1,186,006, the index adjusted for seasonal tendencies moving up from 88.6 to 106.5. The production of rolled oats was 10,030,000 pounds compared with 7,721,000, and oatmeal and corn flour were produced in greater volume after seasonal adjustment. The manufacture of sugar was 88,089,000 pounds, compared with 57,332,000 in the preceding four-week period.

Cattle slaughtering was heavier, the total being 99,081 head, compared with 88,135. The gain in lamb and sheep slaughtering was less than normal for the season and the slaughter of hogs showed decline. Cheese exports were in lesser volume, while a marked gain was shown in exports of canned salmon.

Textiles

Imports of raw material by the textile industry showed marked gain in August, indicating preparation for increased operation in textile mills. The index of textile imports was 136.7 in August compared with 111.3 in July, adjustment being made for seasonal tendencies. Imports of raw cotton were 10,784,000 pounds compared with 9,790,000, the adjusted gain being about 14 p.c. A decline was shown in the imports of cotton yarn, the total being 345,000 pounds compared with 513,000. Imports of raw wool and wool yarn were 2,009,084 pounds compared with 1,246,000, the adjusted gain being pronounced.

Forestry

Marked gain was shown in the operations of the paper and lumber industries, the index moving up from 87 to 94. The output of newsprint was 194,262 tons compared to 180,387 in July and shipments in August were greater than production resulting in a decline in mill stocks. The gain in wood-pulp exports was less than normal for the season. Exports of planks and boards were 128,459,000 feet compared with 116,179,000, the adjusted gain being nearly 11 p.c. The gain in the exports of shingles was from 205,986 squares to 257,993.

Steel and Motors

Operations in the iron and steel industry were well maintained in August, the output of steel being 48,659 tons compared with 49,076, while pig iron production was 35,233 tons compared with 31,689. Imports of iron and steel were valued at \$6,079,000 compared with \$5,636,000, the index moving up from 35.1 to 37.2. The production of motor cars was 6,079 units compared with 6,540, a moderate decline being shown after seasonal adjustment. Imports of crude rubber were 4,022,000 pounds compared with 2,670,000. Petroleum imports at 116,300,000 gallons compared with 118,271,000 showed a gain of nearly 2 p.c. after seasonal adjustment.

Construction

Operations in the construction industry continued at a low level, contract awards being \$9,480,000 compared with \$12,652,000 in July. Building permits at \$1,928,000 compared with \$2,082,000, were slightly more than maintained after seasonal adjustment.

Distribution

Carloadings made a good showing in August, the total being 185,555 compared with 162,728 in the preceding month, the adjusted gain being 8.5 p.c. Imports showed the fourth consecutive gain since April, the total being \$38,747,000 compared with \$35,738,000 in July. Exports declined from the relatively high level of the preceding month, the decline after seasonal adjustment being about 9 p.c. The total was \$45,135,000 compared with \$51,866,000.

Owing mainly to the decline in speculative activity bank debits at \$2,648,500,000 showed a decline of 18 p.c. from the high level of the preceding month.

Three Representative Factors

The reading from the chart of three representative factors continued favourable in August. The further expansion in business operations and the advance in high-grade bonds were the chief influences in maintaining the economic situation in the month under review. Owing to the reaction in common stock prices during the latter part of July, the index for August was lower than for the preceding month, but the weekly indexes disclose that a moderate advance was in evidence in August, counterbalancing the greater part of the reaction. The advance in stock prices from April to July was so rapid that there was a tendency for speculative values to get out of line with other major factors. The important gain in business operations in August was a favourable development indicating an increase in corporate revenues.

Crop Production

Owing mainly to Dominion-wide deficiency in summer rainfall and to periods of abnormally high temperatures, the total estimated yields of Canadian grain crops in 1933 were considerably below the averages of recent years. Reports from crop correspondents relating to conditions at the end of August indicated that yields of all grains were much below the average, showing a similarity to the harvests of the dry season in 1931. The production of wheat in the present

year is the lowest since 1924. The oat crop is less than in any year since 1929, barley since 1921 and rye since 1931, while the crop of flaxseed is the lowest in the records of the Bureau dating back to 1908.

The wheat crop is estimated at 282,771,000 bushels compared with 428,514,000 in 1932. The production of oats is forecast at 316,966,000 bushels compared with 391,561,000. Barley and rye show declines of 20 p.c. and 28 p.c., respectively, while flaxseed production is forecast at 756,000 bushels compared with 2,446,000.

Judged by conditions at August 31, late sown crops, including corn, potatoes and sugar beets were distinctly less promising than in 1932, being about 20 p.c. below the average.

Production in Canada and the United States

The economic betterment of Canada in the period from April to August paralleled that of the United States, but the gain in the latter country was more rapid. Measured by the index of industrial production published in the Federal Reserve Bulletin the lowest point for the United States was reached in July, 1932. The advance in the third quarter was not quite counterbalanced by the reaction culminating last March. The recovery from March to July was spectacular, the gain in the index being no less than 63.5 p.c. The lowest point of industrial production in Canada measured by the official index was reached in February. The gain from March to July was 32 p.c., slightly more than half the percentage gain shown in the similar index reflecting conditions in the United States.

The index of manufactures for the United States showed a gain of 77 p.c. during the four months, while the gain in the Canadian index was 41 p.c.

While the official indexes of production for Canada and the United States are prepared by different methods, a comparison of them is interesting for determining the current trend, and many points of resemblance are shown in the trends of industrial groups in the two countries. Industrial production showed a greater percentage gain in the United States, but the betterment in Canada from March to July was pronounced.

The recovery in manufacturing was the main influence in raising the index of Canadian industrial production. The gain in mineral production in the United States was relatively moderate, while in Canada the indicators for July showed a decline which was counterbalanced by gains in August. Recovery in the construction industry in either country was inconsiderable and operations continue at a relatively low level.

The charts on pages 10 and 15 show the relative position in the two countries in recent months.

Stock prices in principal countries

Supplementing the information and charts given in recent numbers of the Monthly Review regarding steel production and industrial production generally in the principal countries, a chart is given on page 30 relating to indexes of common stocks.

Industrial stock prices, reflecting improved prospects for corporate profits contingent upon heavier volume and rising prices, have shown continued gain in Great Britain and until recently in Germany since the second quarter of 1932. Gains were recorded in Canada and the United States from June to September, 1932, and from March to July of the present year. Stocks in France rallied in June and July, counterbalancing the decline in the early months of the year.

Wholesale Prices

While wholesale prices averaged lower in August than in the preceding month, moderate advances were recorded in six groups out of the eight in the official classification. The decline was limited to crop products and non-ferrous metals, which had shown marked advances in preceding months. No. 1 Manitoba cash wheat averaged 73.4 cents per bushel compared with 83.4 in July, barley, flax and rye being also at substantially lower levels. Copper, lead, tin and zinc, according to Montreal and Toronto quotations, averaged lower in August than in the preceding month. Other price changes included the advance in groundwood pulp from \$19.77 per ton to \$21.09, and further gains in domestic wool. As a result of firmer crude oil prices in both Canadian and American producing areas, quotations for kerosene and gasoline were higher.

Stocks and Bonds

Owing to the decline in common stock prices in the latter part of July, the average for August was lower than in the preceding month. A moderate but steady recovery was in evidence during August, counterbalancing a considerable portion of the ground lost by the reaction. The decline in the index of 126 common stocks from the level of the preceding month was 5.5 p.c. while the drop in industrials and utilities was 4.2 p.c. and 7.8 p.c., respectively. Referring to the weekly trend, the highest point of the present movement was reached in the week of July 20, when the index for 118 common stocks was 81.1. This compares with 74.0, the index for the week of September 14. The index for 93 industrials was 103.9 on September 14 compared with 111.1 on July 20, while the index of 19 utilities was 45.6 on September 14, compared with 53.1 on July 20.

Owing to the advance in the gold stocks, the mining stock index was higher in the week ended September 7 than in the week of July 20. The index of 11 gold stocks advanced during the meantime from 103.1 to 105.5 and the general index for 20 mining stocks was up from 111.2 to 111.7.

The index number for 22 preferred stocks was 61.7 in August as compared with 61.9 in July. These indexes compare with 45.2 in June, 1932, the lowest point reached in recent years.

CONDITIONS IN THE UNITED STATES

Moderate decline was shown in the business operations of the United States during August, the level being moderately below the maximum on the present movement reached in the preceding month. The trend of the weekly indexes of business was moderately downward during the month under review, the index of the Business Week being 62.8 in the week ended September 2, compared with 68.7 in the week of August 5. Owing to contraction in retail sales and the preparation for new models by certain manufacturers, the output of motor cars declined sharply in August. Weekly estimates of steel mill activity averaged 45 p.c. of capacity in the first week of September compared with 56 p.c. in the first week of August and 57.5 p.c. at the middle of July—the high point for the year.

Power production was well maintained throughout August, the sharp increase in total sales from March to July resulting almost entirely from the increase in sales to industrial users, with sales to commercial and residential users showing but small changes. Carloadings after adjustment for seasonal tendencies declined 3 p.c. Relative stability of the wholesale price level was characteristic of August as measured by the Dept. of Labour weekly index. The advance of about four months culminated in the week ended July 22, and very moderate change was shown in the six subsequent weeks. Common stock prices reacted in the latter weeks of July and recovered moderately during the month under review.

CONDITIONS IN GREAT BRITAIN

The latest figures indicate general improvement in the British business situation. Both imports and exports in August increased substantially as compared with the preceding month and with the same month of last year, imports in August reaching £56,754,000 and exports of British products £31,000,000, the latter figure an increase of £1,000,000 over July and of nearly £2,500,000 over August, 1932. Nearly four-fifths of the domestic exports in August were "articles wholly, or mainly manufactured."

Unemployment dropped by 31,000 between July 24 and August 21, improvement being shown by the iron and steel, general engineering, shipbuilding, shipping, electrical apparatus, wool and textiles, coal mining and building industries. The number of registered unemployed in Great Britain was 2,411,000 on August 21, as compared with 2,860,000 on the corresponding date of 1932, a reduction of 449,000.

The new Canadian loan was at a premium of approximately 4 per cent in London on September 6.

DOMINION BUREAU OF STATISTICS, OTTAWA, September 21, 1933.

Table 24. Summary of Canada's Imports, in Thousands of Dollars

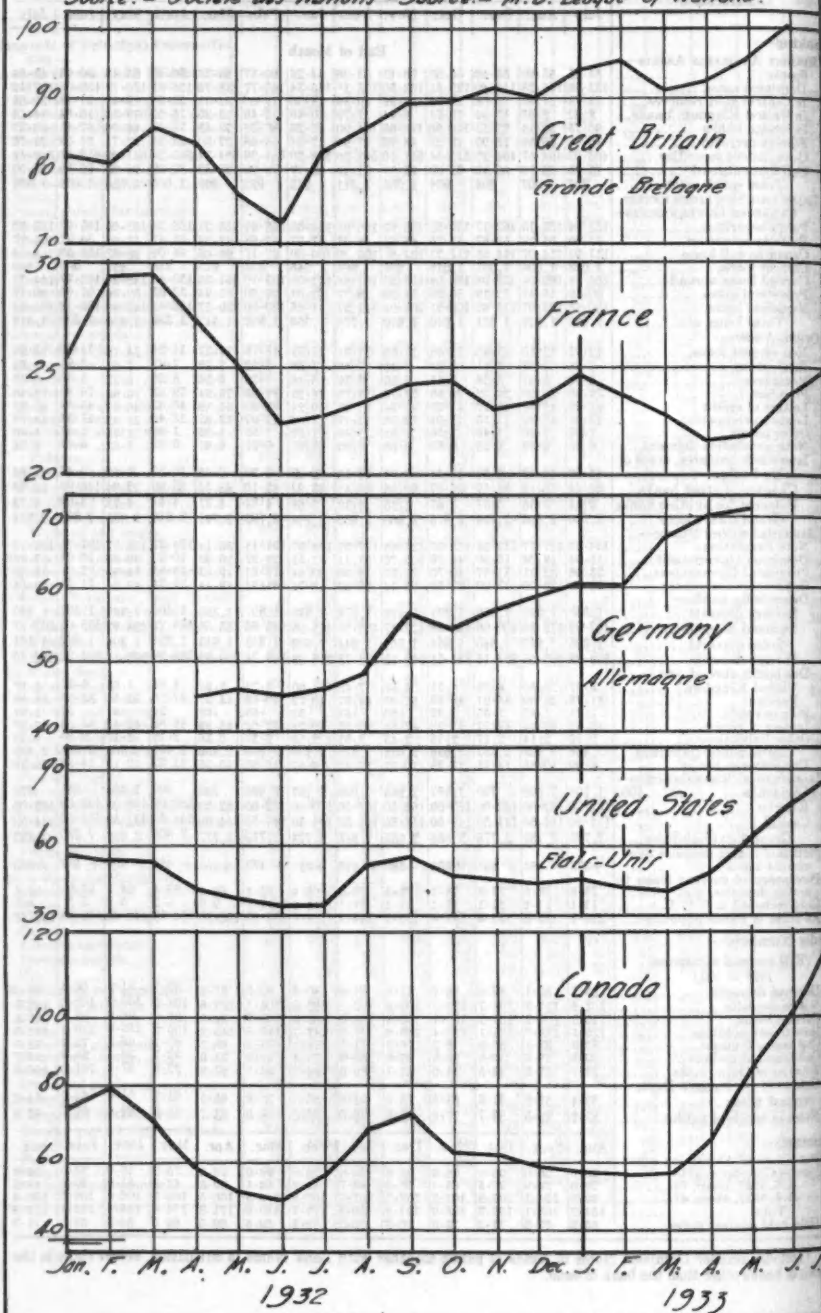

Classification	1932					1933											
	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Imports of Principal Commodities—																	
AGRICULTURAL AND VEGETABLE PRODUCTS—																	
Alcoholic beverages.....	1,122	1,053	1,358	1,537	2,305	894	798	2,505	750	1,003	1,028	946	990				
Cocoa and chocolate.....	60	113	135	136	147	85	95	103	62	122	90	180	96				
Coffee and chicory.....	206	173	276	352	389	454	296	600	248	318	226	271	224				
Fruits.....	1,746	1,505	1,651	1,338	1,587	788	696	998	945	1,462	1,652	1,536	1,350				
Nuts (edible).....	77	97	107	110	61	109	88	90	152	148	119	138	137				
Rubber (chiefly raw).....	106	111	274	321	183	160	116	215	105	208	309	156	186				
Seeds.....	219	435	231	266	185	201	216	352	168	358	337	377	606				
Sugar, chiefly for refining.....	19	21	38	43	109	95	113	125	75	79	15	14	27				
Ten.....	2,042	1,562	1,872	1,479	897	384	397	2,173	262	1,552	2,007	1,299	1,965				
Tea.....	261	287	802	377	339	366	759	1,000	117	161	184	299	473				
Vegetables.....	95	81	91	200	211	261	231	499	424	609	674	194	77				
ANIMAL PRODUCTS—																	
Fish.....	98	136	174	147	116	71	61	101	48	60	97	146	141				
Fur, chiefly raw.....	211	246	201	180	176	273	281	431	161	547	419	375	414				
Hides.....	95	96	233	240	116	123	116	80	64	153	243	181	483				
Leather, unmanufactured.....	220	197	190	156	125	102	127	133	90	173	205	271	365				
Leather, manufactured.....	109	147	117	91	77	49	94	109	121	124	86	78	106				
TEXTILE PRODUCTS—																	
Artificial silk.....	198	199	200	165	168	182	216	252	131	164	163	180	247				
Cotton, raw.....	471	441	459	1,181	1,122	706	498	508	354	749	787	1,038	1,301				
yarn.....	201	232	236	140	149	186	143	199	96	177	235	239	174				
other.....	813	747	788	739	552	725	794	1,007	653	806	870	850	987				
Flax, hemp and jute.....	510	435	589	603	491	423	396	406	323	486	516	599	609				
Hats and caps.....	122	101	50	25	13	32	84	86	62	56	27	39	60				
Manila and sisal grass.....	143	159	227	221	245	163	87	179	82	103	143	218	141				
Silk—Raw.....	460	584	546	471	327	415	285	342	284	363	446	452	486				
Fabric.....	105	235	211	97	70	89	84	117	90	89	77	206	201				
Wearing apparel.....	90	99	92	70	87	60	62	97	48	51	45	32	60				
Wool—Raw wool.....	96	83	116	157	191	138	105	179	118	147	194	180	208				
Nolls and tops.....	174	230	255	246	296	374	262	287	138	241	370	494	416				
Woolen yarn.....	171	143	223	221	185	199	146	184	108	201	304	256	334				
Worsted and merges.....	284	228	154	138	138	188	247	272	123	134	125	166	271				
Other wool.....	433	441	387	347	282	278	450	332	272	355	379	468	748				
WOOD AND PAPER—																	
Books and printed matter.....	828	874	907	871	744	618	605	776	531	643	683	670	701				
Paper.....	496	517	567	536	421	401	493	511	316	466	416	418	482				
Wood—Furniture and other manufactured wood.....	247	213	215	232	201	173	174	184	112	216	460	219	267				
Planks and boards.....	101	93	140	147	116	64	64	73	65	101	160	222	220				
Veneers.....	26	23	39	17	11	9	15	11	5	7	20	24	24				
Other unmanufactured wood.....	47	10	33	43	73	39	34	56	33	40	38	22	10				
IRON AND STEEL—																	
Automobiles.....	62	60	38	32	14	104	59	91	133	100	123	103	134

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

Vol. VIII

OTTAWA, SEPTEMBRE, 1933

N° 9

STATISTICIEN DU DOMINION: R. H. COATS, B.A., F.S.S. (HON.), F.R.S.C.
CHIEF DE LA SECTION DE LA STATISTIQUE GÉNÉRALE: S. A. CUDMORE, M.A., F.S.S.
ADJOINT (STATISTIQUES ÉCONOMIQUES): S. B. SMITH, M.A.

STATISTIQUE COURANTE DES AFFAIRES AU CANADA

En dépit de la réaction spéculative notée à la fin de juillet, la situation économique s'est bien maintenue au cours d'août. Les éléments favorables tendant à inspirer confiance sont les gains substantiels des opérations commerciales qui vont s'améliorant depuis le commencement du deuxième trimestre de l'année en cours, ainsi que la fermeté significative des obligations de tout repos, indication que la situation du crédit continue de s'améliorer. Le rendement des effets publics de l'Ontario est de 4.55% au mois d'août contre 4.63% le mois précédent, reflétant ainsi une hausse substantielle des cours. Les prix de demande de quatre obligations fédérales (remboursement) accusent des hausses graduelles au cours du mois; ils ont atteint le maximum depuis l'abandon en 1931 de l'étalon or par la Grande-Bretagne. Le rendement des quatre valeurs est calculé à 4.43%, contre 4.50% le mois précédent.

Le fléchissement des dépôts à demande à la fin de juillet est surtout d'ordre saisonnier; les dépôts à terme et les prêts courants ont également diminué. Le portefeuille se monte à \$865,900,000, atteignant ainsi un nouveau maximum qui contribue à l'amélioration des disponibilités bancaires.

L'indice des actions ordinaires a baissé de 83.3 qu'il était en juillet à 78.7. Bien que la moyenne ait baissé, l'analyse hebdomadaire indique que, subseqüemment à la réaction constatée vers la fin de juillet, la tendance d'août est à la hausse.

Il fait plaisir de constater que la réaction des valeurs spéculatives ne s'est pas trouvée en conflit avec le développement industriel, les opérations commerciales accusant un fort accroissement sur juillet. L'indice du volume physique des opérations commerciales a augmenté de 84.1 à 89.8, accroissement de 6.8%.

Production minérale

La plupart des indicateurs servant à mesurer la production minérale montrent des gains. Bien que les exportations de nickel aient baissé de 10,501,100 à 8,443,800 livres, cette diminution n'est pas importante. Les expéditions du mois d'août ne donnent que 1,022,000 livres, mais l'indice est plus élevé que celui de tout autre mois de l'année passée. Les mines d'or canadiennes ont expédié à la Monnaie et à l'étranger un total de 211,062 onces, contre 192,740 en juillet, l'augmentation après rajustement dépassant 23%. Les expéditions d'argent ont augmenté de 936,009 onces à 1,374,068; les exportations de minerai de cuivre et de cuivre ampoule ont augmenté de 3,734,900 livres à 7,660,200, de sorte que l'indice est monté de 36.6 à 68.0. Les exportations d'amiante de première qualité donnent 8,342 tonnes contre 6,259, l'augmentation dépassant 32% après ajustement. Les importations de bauxite pour la fabrication de l'aluminium ont augmenté de 4,799,600 livres à 12,176,600.

Denrées alimentaires

Les fabriques de denrées alimentaires enregistrent un regain d'activité, l'indice étant de 100.1 contre 88.5 en juillet. La production de farine au cours du dernier mois pour lequel on possède des données s'élève à 1,322,923 barils contre 1,186,006 le mois précédent, l'indice, après ajustement pour tendances saisonnières, montant de 88.6 à 106.5. La production d'avoine roulée donne 10,030,000 livres, contre 7,721,000. On enregistre également des accroissements pour le gruau d'avoine et la farine de maïs. Les raffineries ont produit 88,089,000 livres de sucre contre 57,332,000 les quatre semaines précédentes.

Les abatages de bêtes à cornes accusent une augmentation, le total étant de 99,081 têtes comparativement à 88,135. On a sacrifié moins de moutons et d'agneaux que d'ordinaire; quant aux porcs, on constate également une diminution. Les exportations de fromage ont diminué, tandis que celles de saumon en conserve donnaient un accroissement prononcé.

Textiles

Les importations de matières premières par l'industrie textile montrent une augmentation prononcée, indication que les fabriques textiles se préparent à augmenter leur production. L'indice de ces importations est monté de 111.3 à 136.7, après tendances saisonnières. Les importations de coton brut donnent 10,784,000 livres contre 9,790,000, gain ajusté d'environ 14%. Quant aux exportations de fils de coton, on'enregistre un fléchissement; elles ont baissé de 513,000 livres à 345,000. Les importations de laine en suint et de fils de laine s'élèvent à 2,009,084 livres, comparativement à 1,246,000 en juillet, le gain, après ajustement, étant des plus prononcés.

Industries forestières

Les opérations des industries du papier et du bois donnent un fort gain, de sorte que l'indice est monté de 87.0 à 94.0. La production de papier-journal donne 194,262 tonnes, contre 180,387 le mois précédent; les ventes d'août dépassant le chiffre de production, les stocks se trouvent diminués d'autant. Les exportations de pâte de bois n'ont pas augmenté autant que d'ordinaire. Les exportations de planches et madriers donnent 128,459,000 pieds, contre 116,179,000, gain ajusté de près de 11%. Les exportations de bardeaux ont augmenté de 205,986 carrés à 257,960.

Acier et moteurs

Dans la sidérurgie, l'activité s'est bien maintenue au cours d'août, la production d'acier s'élevant à 48,659 tonnes, contre 49,076 le mois précédent, tandis que la production de fonte a augmenté de 31,689 tonnes à 35,233. Les importations de fer et d'acier donnent \$6,079,000, comparativement à \$5,636,000, de sorte que l'indice est monté de 35.1 à 37.2. La production d'automobiles se monte à 6,079 unités, contre 6,540, montrant ainsi un léger déclin après ajustement saisonnier. Les importations de caoutchouc brut se chiffrent par 4,022,000 livres, contre 2,670,000 et celles de pétrole à 116,300,000 gallons contre 118,271,000, gain de près de 2% après ajustement saisonnier.

Construction

Il ne règne pas beaucoup d'activité dans le bâtiment, les nouvelles entreprises donnant \$9,480,000, contre \$12,652,000 le mois précédent. Les permis de bâtir se totalisent à \$1,928,000 contre \$2,082,000, léger accroissement en tenant compte de l'ajustement saisonnier.

Distribution

Les transports commerciaux par les chemins de fer donnent 185,555 wagons, comparativement à 162,728 en juillet, gain ajusté de 8.5%. Les importations accusent un accroissement pour la quatrième fois depuis le mois d'avril; elles ont atteint \$38,747,000 contre \$35,738,000 en juillet. Les exportations accusent une diminution sur le total relativement élevé du mois précédent; la diminution, en tenant compte de l'ajustement saisonnier, équivalant à 9% environ. Le total est de \$45,135,000 comparativement à \$51,866,000, mais il accuse un accroissement sur le mois correspondant de l'année passée.

En raison, notamment, du ralentissement des opérations spéculatives, les débits bancaires enregistrent une diminution de 18% sur le mois précédent et ont baissé à \$2,648,500,000.

Trois facteurs représentatifs

La lecture du graphique de trois facteurs représentatifs montre que la situation demeure favorable en août. L'expansion des activités commerciales et la hausse des valeurs de tout repos sont les deux éléments qui ont maintenu la situation économique. En raison de la réaction des actions ordinaires vers la fin de juillet, l'indice d'août marque une baisse sur le mois précédent, mais les indices hebdomadaires révèlent une hausse modérée qui contrebalance la plus grande partie de la réaction. La hausse des titres à partir d'avril jusqu'à juillet a été si rapide que des valeurs spéculatives ont marqué une avance hors proportion comparativement aux autres facteurs majeurs. Le gain considérable de l'activité commerciale au mois d'août est un développement favorable indiquant un accroissement des revenus des corporations.

Récoltes

En raison, notamment, du manque de pluie au cours de l'été et de la température anormalement élevée, les rendements des récoltes canadiennes en 1933 sont de beaucoup inférieurs aux moyennes des quelques dernières années. Les rapports des correspondants agricoles sur la situation à la fin d'août indiquent que le rendement de tous les grains est considérablement

plus bas que les moyennes; la similarité avec les conditions de 1931 est frappante. La production de blé n'a jamais été plus basse depuis 1924. La récolte d'avoine est la moins abondante depuis 1929. Quant aux récoltes d'orge et de seigle, elles sont les moins abondantes depuis 1921 et 1931 respectivement, tandis que la récolte de graine de lin est inférieure à toute autre depuis 1908, première année où le Bureau a recueilli des données sur cette culture.

La récolte de blé est estimée à 282,771,000 boisseaux, contre 428,514,000 en 1932, et celle d'avoine à 316,966,000 boisseaux, contre 391,561,000. Pour ce qui est de l'orge et du seigle, on enregistre des fléchissements respectifs de 20 p.c. et 28 p.c.; quant à la graine de lin, les prévisions donnent 756,000 boisseaux, contre 2,446,000 l'année précédente.

A juger des conditions existant le 31 août, les récoltes tardives, y compris le maïs, les pommes de terre et les betteraves à sucre, s'annoncent moins abondantes qu'en 1932; on s'attend à ce qu'elles produisent environ 20 p.c. de moins que la moyenne.

La production au Canada et aux Etats-Unis

L'amélioration économique au Canada à partir d'avril jusqu'à août marque les mêmes tendances qu'aux Etats-Unis; toutefois le gain aux Etats-Unis a été plus rapide. Si l'on prend pour base l'indice de la production industrielle publié par le Federal Reserve Bulletin, le maximum du fléchissement aux Etats-Unis fut atteint en juillet 1932. Le gain au cours du troisième trimestre ne compense pas entièrement la réaction qui atteignit son point culminant en mars 1933. Le relèvement à partir de mars jusqu'à juillet est extraordinaire, l'indice ayant monté de 63.5 p.c. D'après l'indice officiel, le minimum de la production industrielle au Canada fut atteint en février. Entre mars et juillet on enregistre un accroissement de 32 p.c., soit un peu plus que la moitié du gain marqué par l'indice correspondant des Etats-Unis.

L'indice de la production manufacturière marque une augmentation de 77 p.c. au cours des quatre mois, contre 41 p.c. au Canada.

Bien que les indices de production ne soient pas calculés de la même façon dans les deux pays, il est intéressant d'établir des comparaisons dans le but de déterminer les tendances courantes. On découvre une grande ressemblance entre les deux pays dans les tendances des groupes industriels. Il est vrai que la production industrielle accuse un gain relativement plus élevé aux Etats-Unis, mais on constate également une amélioration prononcée au Canada entre mars et juillet.

La hausse de l'indice de la production industrielle au Canada est attribuable, principalement, au relèvement de l'industrie manufacturière. La reprise de la production minière aux Etats-Unis est relativement modérée, tandis que pour le Canada les indicateurs marquent en juillet un fléchissement contrebalancé par les gains du mois d'août. La reprise dans les industries du bâtiment est peu considérable tant au Canada qu'aux Etats-Unis, et l'activité se continue sur un niveau relativement peu élevé.

Les graphiques aux pages 10 et 15 donnent la position relative des deux pays pendant les quelques derniers mois.

La cote dans les principaux pays

Complémentant l'information et les graphiques contenus dans les derniers numéros de la Revue et se rapportant à la production d'acier et à la production industrielle des principaux pays, le présent numéro contient un graphique (page 30) qui donne les indices des actions ordinaires.

Les actions industrielles marquent une hausse continue en Grande-Bretagne, signe que l'on s'attend à un accroissement des profits des corporations provenant de l'augmentation en volume et de la hausse des prix. Il en est de même pour l'Allemagne depuis le deuxième trimestre de 1932. Au Canada et aux Etats-Unis on enregistre des gains de juin à septembre 1932 et de mars à juillet 1933. Quant à la France, on remarque une hausse pour juin et juillet qui contrebalance la baisse enregistrée pendant les premiers mois de l'année en cours.

Prix de gros

Bien que les prix de gros soient, en moyenne, plus bas qu'en juillet, on constate des hausses dans six des huit groupes de la classification officielle. Le fléchissement est limité aux produits de la terre et aux métaux autres que le fer qui accusaient des hausses prononcées précédemment. Le blé Manitoba n° 1 au comptant cotait à 73.4 cents le boisseau, contre 83.4 en juillet; l'orge, la graine de lin et le seigle marquent également des baisses. Les cotes de Montréal et Toronto

indiquent que les moyennes pour le cuivre, le plomb, l'étain et le zinc sont inférieures à celles du mois précédent. La pulpe mécanique a augmenté de \$19.77 la tonne à \$21.09. La laine domestique a également haussé. En raison du raffermissement des huiles brutes enregistrés tant au Canada qu'aux États-Unis, la kérosène et l'essence ont monté.

Valeurs mobilières

En raison du fléchissement des actions ordinaires vers la fin de juillet, la moyenne d'août est inférieure à celle du mois précédent. Le gain modéré mais continu d'août contrebalance presque entièrement le fléchissement enregistré pendant la réaction. La baisse de l'indice de 126 actions ordinaires est de 5.5 p.c. sur le mois de juillet; pour ce qui est des actions industrielles et des utilités, les baisses respectives équivalent à 4.2 p.c. et 7.8 p.c. En ce qui concerne la tendance hebdomadaire, le maximum du mouvement actuel fut atteint le 20 juillet lorsque l'indice de 118 actions ordinaires était de 81.1. Pour la semaine terminée le 14 septembre, il est de 74.0. L'indice de 93 titres industriels est de 103.9 le 14 septembre, contre 111.1 le 20 juillet, tandis que celui de 19 utilités est de 45.6 contre 53.1.

Grâce à la hausse des actions de mine d'or, l'indice des titres miniers était plus élevé la semaine terminée le 7 septembre que la semaine du 20 juillet; l'indice de 11 titres a augmenté de 103.1 à 105.5, tandis que l'indice d'ensemble de 20 titres miniers est monté de 111.2 à 111.7.

L'indice de 22 actions privilégiées est de 61.7 contre 61.9 en juillet et 45.2 en juin 1932, niveau le plus bas depuis quelques années.

La situation aux États-Unis

Les opérations commerciales marquent un fléchissement modéré pendant le mois d'août, le niveau étant légèrement inférieur au maximum du mouvement actuel qui fut atteint le mois précédent. La tendance des indices commerciaux hebdomadaires est quelque peu à la baisse, l'indice étant de 62.8 la semaine terminée le 2 septembre, contre 68.7 la semaine du 5 août. En raison du fléchissement des ventes au détail et de la création de nouveaux modèles par certains fabricants, la production de voitures-automobiles accuse au mois d'août une diminution prononcée. Les estimations hebdomadaires de l'activité dans l'aciérie placent la moyenne de la production à 45 p.c. de la capacité pour la première semaine de septembre, contre 56 p.c. la semaine correspondante du mois d'août et 57.5 à la mi-juillet, maximum de l'année.

La production d'énergie s'est bien maintenue au cours du mois d'août, l'accroissement prononcé des ventes entre mars et juillet étant attribuable presque entièrement aux achats par les usagers industriels; les ventes aux usagers commerciaux et particuliers ne marquent que peu de changement. Les changements des chemins de fer accusent une diminution de 3 p.c. après ajustement pour tendances saisonnières. D'après l'indice hebdomadaire de l'Office du Travail, les prix de gros ont été relativement fermes pendant le mois d'août. La hausse répartie sur les derniers quatre mois a atteint son maximum la semaine terminée le 22 juillet, les six semaines suivantes marquant un léger changement. Les cotes des actions ordinaires ont réagi au cours de la deuxième quinzaine de juillet mais se sont relevées quelque peu le mois suivant.

LA SITUATION EN GRANDE-BRETAGNE

Les chiffres les plus récents révèlent que la situation en Grande-Bretagne s'est beaucoup améliorée. Les importations et les exportations d'août marquent des accroissements substantiels sur le mois précédent et le mois correspondant de l'année passée; les premières atteignent £56,754,000 et les secondes (produits britanniques) £31,000,000. Les exportations accusent donc des accroissements respectifs de £1,000,000 et près de £2,500,000 sur le mois précédent et le mois correspondant de 1932. Près de 80 p.c. des produits domestiques exportés en août se classent sous la rubrique "articles entièrement ou presque entièrement manufacturés".

Le nombre de sans-travail a diminué de 31,000 entre le 24 juillet et le 21 août, l'amélioration se répartissant parmi les rubriques suivantes: sidérurgie, travaux de génie, chantiers maritimes, transports maritimes, appareillage électrique, laine et textiles, charbonnages, et métiers du bâtiment. Le nombre de chômeurs enregistrés le 21 août est de 2,411,000, contre 2,860,000 en 1932, diminution de 449,000.

La prime sur l'emprunt canadien à Londres est d'environ 4 p.c. le 6 septembre.
